Company Overview

Zorgapp Corporation was founded two years ago, and was founded by Henry as its chairman, engaged in blockchain technology and they have developed many apps. We also became interested in solana blockchain which is fast and very cheap in transaction fees. And seeing their fairly fast development over the past year made us to open an app that is useful for many people.

Our target for this year is to develop a wallet app, where the wallet can access everything, Nft, Dex, Dapps, Swap, Stacking, and Farm
